

SealBoss D.I.Y. Can-Seal-Foam Kit™

up to 8 Gal Foam From 27 oz Can

Professional Grade, Universal Use Polyurethane Foam

THE Important Difference

SealBoss Can-Seal-Foam is engineered to fully expand inside the applicator 'gun barrel'. When the foam exits the tip of the gun it is almost fully expanded - you apply exactly as much foam as you need without the messy and undesired "mushrooming" experience you may have with most of the other 'over the counter' foam products. This feature makes our foam 'predictable' and useable in areas where other products just won't perform.

With our foam and the professional applicator gun you can fill voids precisely. Contractors use our foam for many applications such as water-stop purposes in voids and cable runs, as an insulation and seal-foam in general construction and as an instant 'Backer Rod Bead' in applications where joints need a back fill prior to applying the final sealant.

Type Of Material

Can-SealFoam is a closed cell self curing foam for universal uses. The product is a single component MDI based polyurethane of highest quality. It expands, bonds and seals while stopping the passage of air, gases, water and dust. Besides its obvious uses to stop water infiltration it can increase energy efficiency by stopping air exchange around windows, doors, wall intrusions and at sill plates. Its lightweight, closed cell structure makes it useful for deadening sound, flotation and thermal insulation.

Waterproofing:

- Cable Runs
- Seals electrical conduits
- Utility Boxes, etc.
- Seals around pipes / ducts

And Much More:

- Increases energy efficiency
- Reduces noise
- Radon Gas Control
- Seals out insects
- Confines asbestos fibers
- Strengthens tub bases
- Seals stress panels
- Upgrades weatherization
- Repairs boat flotation
- Seals refrigeration panels
- Reusable Professional Applicator Gun

Features

- Professional Steel Gun Applicator allows for precise dispersion of product and avoids overflow
- Ozone Friendly
- Very High Volume From Small Can

Benefits

- No Cleaning
- Low Cost
- Many Start Ups and Closures

Volume

- 7 to 9 gal Foam
- 1800 Cu. inches
- 1/2" Bead runs 900 lin. ft.

The Commercial Grade Do It Yourself Kit includes:

- 1 Professional Control Reusable Steel Gun Applicator with plastic extension tube
- 5 Can-Seal-Foam 27 oz
Potential foam capacity 40+ gallons
- 1 Data Sheets
- 1 Pair Latex Gloves
