

SealBoss® Can-Seal-Foam Kit

up to 8 Gal Foam From 27 oz Can

Professional Grade, Universal Use Polyurethane Foam

THE Important Difference

SealBoss® Can-Seal-Foam is engineered to fully expand inside the applicator 'gun barrel'. When the foam exits the tip of the gun it is almost fully expanded - you apply exactly as much foam as you need without the messy and undesired "mushrooming" experience you may have with most of the other 'over the counter' foam products. This feature makes our foam 'predictable' and useable in areas where other products just won't perform.

With our foam and the professional applicator gun you can fill voids precisely. Contractors use our foam for many applications such as water-stop purposes in voids and cable runs, as an insulation and seal-foam in general construction and as an instant 'Backer Rod Bead' in applications where joints need a back fill prior to applying the final sealant.

RANGE OF APPLICATION

- **Waterproofing:**
 - Cable Runs
 - Seals electrical conduits
 - Utility Boxes, etc.
 - Seals around pipes/ducts

- Increases energy efficiency
- Reduces noise
- Controls radon
- Seals out insects
- Confines fibers
- Strengthens tub bases
- Seals stressskin panels
- Upgrades weatherization
- Repairs boat flotation
- Seals refrigeration panels

FEATURES

- Professional Control Steel Gun Applicator
- Ozone Friendly
- High Volume From Small Can

BENEFITS

- No Cleaning
- Low Cost
- Unlimited Start Ups and Closures

VOLUME

- 8 to 9 gal Foam
- 1800 Cu. inches
- 1/2" Bead runs 900 lin. ft.

TYPE OF MATERIAL

Can-SealFoam is a closed cell self curing foam for universal uses. The product is a single component MDI based polyurethane of highest quality. It expands, bonds and seals while stopping the passage of air, gases, water and dust. Besides its obvious uses to stop water infiltration it can increase energy efficiency by stopping air exchange around windows, doors, wall intrusions and at sill plates. Its lightweight, closed cell structure makes it useful for deadening sound, flotation and thermal insulation. It is also useful for scaling work areas prior to stripping to prevent the transport of fibers.

Can-SealFoam is very efficient, you get up to eight gallons pf foam just from one can!

Insulation Value: The product has an R-Value of about 4 to 8 depending on the thickness of the bead.

Sound: STC = 69

The Commercial Grade Do It Yourself Kit includes:

- 1 Professional Control Reusable Steel Gun Applicator with plastic extension tube
- 5 Can-Seal-Foam 27 oz
- Potential foam capacity 40+ gallons
- 1 Data Sheets
- 1 Pair Latex Gloves
